

SAFETY DATA SHEET

Dominator® Competition Diesel Oil SAE 20W-50

According to Appendix D, OSHA Hazard Communication Standard 29 CFR §1910.1200 and WHMIS 2015, in compliance with the Hazardous Product Act (HPA, as amended) and the requirements of the Hazardous Product Regulations (HPR).

1. Identification	
Product identifier	
Product name	Dominator® Competition Diesel Oil SAE 20W-50
Product number	DCO
Recommended use of the che	emical and restrictions on use
Application	Engine oil.
Uses advised against	Avoid the formation of mists.
Details of the supplier of the s	afety data sheet
Supplier	AMSOIL INC. Bordner, Ladner, Gervais Scotia Plaza, 40 King St W Toronto, ON, Canada M5H 3Y4 T: +1 416-367-6547
Manufacturer	AMSOIL INC. One AMSOIL Center, Superior, WI 54880, USA. T: +1 715-392-7101 compliance@amsoil.com
Emergency telephone number	<u>r</u>
Emergency telephone	CHEMTREC: Within USA and Canada: 1-800-424-9300 Outside the USA and Canada: +1 703-741-5970 (collect calls accepted) 24/7
2. Hazard(s) identification	
Classification of the substance	e or mixture
OSHA/WHMIS Regulatory Status	This Product is not Hazardous under the OSHA Hazard Communication Standard and according to the hazard criteria of the Hazardous Product Regulations.
Physical hazards	Not Classified
Health hazards	Not Classified
Environmental hazards	Aquatic Acute 3 - H402
Label elements	
Hazard statements	H402 Harmful to aquatic life.
Precautionary statements	P273 Avoid release to the environment. P501 Dispose of contents/ container in accordance with national regulations.
Other hazards	

This product does not contain any substances classified as PBT or vPvB.

3. Composition/information on ingredients	
Mixtures	
Hydrogenated base oil	25 - <50%
CAS number: 72623-87-1	
Classification Asp. Tox. 1 - H304	
Hydrogenated base oil	10 - <25%
CAS number: 64742-55-8	
Classification

General information Get medical attraction Inhalation Move affected breathing. Main Ingestion Rinse mouth thor milk to drink, induce vomiting should be kept	
Inhalation Move affected breathing. Main Ingestion Rinse mouth the or milk to drink. induce vomiting should be kept	
Ingestion Rinse mouth th or milk to drink. induce vomiting should be kept should be kept	ention if any discomfort continues. Show this Safety Data Sheet to the medical
or milk to drink induce vomiting should be kept	person to fresh air and keep warm and at rest in a position comfortable for ntain an open airway. Loosen tight clothing such as collar, tie or belt.
unconscious pe	oroughly with water. Remove any dentures. Give a few small glasses of water Stop if the affected person feels sick as vomiting may be dangerous. Do not g unless under the direction of medical personnel. If vomiting occurs, the head low so that vomit does not enter the lungs. Never give anything by mouth to an erson. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin Contact Rinse with wate	er.
•	tely with plenty of water. Remove any contact lenses and open eyelids wide to rinse for at least 10 minutes.
Protection of first aiders First aid person	nel should wear appropriate protective equipment during any rescue.
Most important symptoms and effects, both act	ite and delayed
	for additional information on health hazards. The severity of the symptoms ary dependent on the concentration and the length of exposure.
Inhalation Prolonged inha	lation of high concentrations may damage respiratory system.
•	I symptoms, including upset stomach. Fumes from the stomach contents may ulting in the same symptoms as inhalation.
Skin contact Prolonged cont	act may cause dryness of the skin.
Eye contact May cause term	porary eye irritation.
Indication of immediate medical attention and s	pecial treatment needed
Notes for the doctor Treat symptom	atically.
Specific treatments No special trea	
5. Fire-fighting measures	tment required.
Extinguishing media	tment required.

Suitable extinguishing media	The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
Special hazards arising from the	he substance or mixture
Specific hazards	Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors.
Advice for firefighters	
Protective actions during firefighting	Avoid breathing fire gases or vapors. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapors and protect men stopping the leak.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Standard Firefighter's clothing including helmets, protective boots and gloves, that provides a basic level of protection during chemical incidents is defined by the Canada Occupational Health and Safety Regulations, by provincial guidelines on occupational health and safety or by NFPA standards if applicable.
6. Accidental release measure	S
Personal precautions, protection	ve equipment and emergency procedures
Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Use protective equipment appropriate for surrounding materials.
Environmental precautions	
Environmental precautions	Harmful to aquatic life. Avoid discharge to the aquatic environment. Avoid discharge into drains or watercourses or onto the ground.
Methods and material for cont	ainment and cleaning up
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Reuse or recycle products wherever possible. Absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Dispose of contents/container in accordance with national regulations.
Reference to other sections	For personal protection, see Section 8. For waste disposal, see Section 13.
7. Handling and storage	
Precautions for safe handling	
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimize spills. Keep container tightly sealed when not in use. Avoid contact with used product. Do not reuse empty containers. Avoid the formation of mists.

Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.
Conditions for safe storage, inc	cluding any incompatibilities
Storage precautions	Store away from incompatible materials (see Section 10). Keep container tightly closed, in a cool, well ventilated place. Protect containers from damage.
Storage class	Chemical storage.
Specific end uses(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.
8. Exposure Controls/personal	protection
Control parameters	
Occupational exposure limits	
Comments	The following constituents are the only constituents of the product which have a PEL, TLV or other recommended exposure limit. At this time, the other constituents have no known exposure limits.
Under conditions which may ge	enerate mists, the following exposure limits are recommended:
Long-term exposure limit (8-ho	ur TWA): 5 mg/10m³
Short-term exposure limit (15-r	ninute): 10 mg/m³
Exposure controls	
Appropriate orginaaring	Provide adaptive vertilation. Coord general vertilation should be adaptive to control worker

Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with OSHA 1910.133 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.6), and any relevant provincial regulation relating to health and safety at work. The following protection should be worn: Chemical splash goggles.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with OSHA 1910.138 and/or the Canadian regulation on health and safety at work, SOR/86-304, Part XII (12.9), and be demonstrated to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke.
Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Provide adequate ventilation. Large Spillages: If ventilation is inadequate, suitable respiratory protection must be worn.

Dominator® Competition Diesel Oil SAE 20W-50

Environmental exposure	Not regarded as dangerous for the environment.
controls	

9. Physical and Chemical Properties		
Information on basic physical	and chemical properties	
Appearance	Liquid.	
Color	Brown.	
Odor	Mild hydrocarbon.	
Odor threshold	Not available.	
рН	Not available.	
Melting point	Not available.	
Initial boiling point and range	Not available.	
Flash point	254°C Cleveland open cup. [ASTM D 92]	
Evaporation rate	Not available.	
Upper/lower flammability or explosive limits	Not available.	
Vapor pressure	Not available.	
Vapor density	Not available.	
Relative density	0.8649	
Solubility(ies)	Not known.	
Partition coefficient	Not available.	
Auto-ignition temperature	Not available.	
Decomposition Temperature	Not available.	
Viscosity	137.5 cSt @ 40°C 18.5 cSt @ 100°C [ASTM D 445]	
Explosive properties	Not considered to be explosive.	
Oxidizing properties	Does not meet the criteria for classification as oxidizing.	
Fire point	266°C Cleveland open cup. [ASTM D 92]	
Pour point	-37°C [ASTM D 97]	
10. Stability and reactivity		
Reactivity	See the other subsections of this section for further details.	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.	
Possibility of hazardous reactions	No potentially hazardous reactions known.	
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.	

Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapors. Carbon dioxide (CO2). Carbon monoxide (CO).

11. Toxicological information

Information on toxicological effects **Toxicological effects** Not regarded as a health hazard under current legislation. Acute toxicity - oral Notes (oral LD₅₀) Based on available data the classification criteria are not met. Acute toxicity - dermal Notes (dermal LD₅₀) Based on available data the classification criteria are not met. Acute toxicity - inhalation Notes (inhalation LC₅₀) Based on available data the classification criteria are not met. Skin corrosion/irritation Animal data Based on available data the classification criteria are not met. Serious eye damage/irritation Serious eye damage/irritation Based on available data the classification criteria are not met. Respiratory sensitization Respiratory sensitization Based on available data the classification criteria are not met. Skin sensitization Skin sensitization Based on available data the classification criteria are not met. Germ cell mutagenicity Genotoxicity - in vitro Based on available data the classification criteria are not met. Carcinogenicity Carcinogenicity Based on available data the classification criteria are not met. IARC carcinogenicity None of the ingredients are listed or exempt. Reproductive toxicity Reproductive toxicity - fertility Based on available data the classification criteria are not met. Reproductive toxicity -Based on available data the classification criteria are not met. development Specific target organ toxicity - single exposure STOT - single exposure Not classified as a specific target organ toxicant after a single exposure. Specific target organ toxicity - repeated exposure STOT - repeated exposure Not classified as a specific target organ toxicant after repeated exposure. Aspiration hazard Based on available data the classification criteria are not met. Aspiration hazard General information No specific health hazards known. The severity of the symptoms described will vary

dependent on the concentration and the length of exposure.

Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin Contact	Prolonged contact may cause dryness of the skin.
Eye contact	May cause temporary eye irritation.
Route of exposure	Ingestion Inhalation Skin and/or eye contact
Target Organs	No specific target organs known.
Medical considerations	Skin disorders and allergies.

Toxicological information on ingredients.

Hydrogenated base oil

Acute toxicity - oral		
Notes (oral LD₅₀)	LD_{50} > 5000 mg/kg, Oral, Rat Read-across data. REACH dossier information.	
Acute toxicity - dermal		
Notes (dermal LD₅₀)	LD_{50} > 5000 mg/kg, Dermal, Rabbit Read-across data. REACH dossier information.	
Acute toxicity - inhalation		
Notes (inhalation LC_{50})	LC₅₀ > 5.53 mg/l, Inhalation, Rat 4 hours Read-across data. REACH dossier information.	
Skin corrosion/irritation		
Animal data	Dose: 0.5 ml, 24 hours, Rabbit Erythema/eschar score: Very slight erythema - barely perceptible (1). Edema score: No oedema (0). Read-across data. REACH dossier information. Not irritating.	
Serious eye damage/irritati	ion	
Serious eye damage/irritation	Dose: 0.1 ml, 30 seconds, Rabbit Cornea score: 0 Iris score: 0 Conjunctivae score: 0.33 Read-across data. REACH dossier information.	
Skin sensitization		
Skin sensitization	Buehler test - Guinea pig: Not sensitizing. Read-across data. REACH dossier information.	
Germ cell mutagenicity		
Genotoxicity - in vitro	Chromosome aberration: Negative. Read-across data. REACH dossier information.	
Reproductive toxicity		
Reproductive toxicity - fertility	Screening - NOAEL > 1000 mg/kg/day, Oral, Rat P Read-across data. REACH dossier information.	
Specific target organ toxicity - repeated exposure		
STOT - repeated exposure	LOAEL 125 mg/kg/day, Oral, Rat Read-across data. REACH dossier information.	
Aspiration hazard		
Aspiration hazard	Aspiration hazard if swallowed.	
	Hydrogenated base oil	

Acute toxicity - oral

	Notes (oral LD₅₀)	LD₅₀ >5000 mg/kg, Oral, Rat REACH dossier information. Based on available data the classification criteria are not met.	
	Acute toxicity - dermal		
	Notes (dermal LD₅₀)	LD₅₀ >2000 mg/kg, Dermal, Rabbit REACH dossier information. Based on available data the classification criteria are not met.	
	Acute toxicity - inhalation		
	Notes (inhalation LC₅₀)	LC₅₀ 2.18 mg/l, Inhalation, Rat REACH dossier information. Based on available data the classification criteria are not met.	
	Skin corrosion/irritation		
	Animal data	Dose: 0.5 ml, 24 hours, Rabbit Primary dermal irritation index: 2.34 / 4 REACH dossier information. Not irritating.	
	Serious eye damage/irrita	tion	
	Serious eye damage/irritation	Dose: 0.1 ml, 1 second, Rabbit REACH dossier information. Not irritating.	
	Skin sensitization		
	Skin sensitization	Buehler test - Guinea pig: Not sensitizing. REACH dossier information.	
	Germ cell mutagenicity		
	Genotoxicity - in vitro	Chromosome aberration: Negative. REACH dossier information.	
	Genotoxicity - in vivo	Chromosome aberration: Negative. REACH dossier information.	
	Reproductive toxicity		
	Reproductive toxicity - fertility	Screening - NOAEL ≥ 1000 mg/kg/day, Oral, Rat P	
	Reproductive toxicity - development	Maternal toxicity: - LOAEL: 125 mg/kg/day, Dermal, Rat REACH dossier information.	
12. Ecolog	ical Information		
Toxicity	Harmfu	Il to aquatic life.	
Ecological	Ecological information on ingredients.		
		Hydrogenated base oil	
	Acute aquatic toxicity		
	Acute toxicity - fish	LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat-head Minnow)	
	Acute toxicity - aquatic invertebrates	EL₅o, 48 hours: > 10000 mg/l, Daphnia magna	
	Acute toxicity - aquatic plants	NOEL, 72 hours: > 100 mg/l, Pseudokirchneriella subcapitata	
	• • • • • • • •		

Toxicity

Aquatic toxicity is unlikely to occur.

Acute aquatic toxicity

	Acute toxicity - fi	LL₅₀, 96 hours: > 100 mg/l, Pimephales promelas (Fat REACH dossier information.	-head Minnow)			
	Acute toxicity - a invertebrates	atic LL₅₀, 24 hours: > 10 000 mg/l, Gammarus pulex REACH dossier information.				
	Acute toxicity - a plants	atic NOEL, 72 hours: ≥ 100 mg/l, Pseudokirchneriella sub- REACH dossier information.	capitata			
	Acute toxicity - microorganisms	NOEL, 10 minutes: > 1.93 mg/l, REACH dossier information.				
	Chronic aquatic t	ricity				
	Chronic toxicity - invertebrates	quatic NOEL, 21 days: 10 mg/l, Daphnia magna REACH dossier information.				
Persistence	and degradability					
Persistence and degradability The degradability of the product is not known.						
Ecological i	nformation on ingra	ients.				
<u></u>		Hydrogenated base oil				
	Biodegradation	Water - Degradation 31%: 28 days Inherently biodegradable.				
		Hydrogenated base oil				
	Persistence and degradability	The product is not biodegradable.				
	Biodegradation	Water - Degradation 2-8%: 28 days				
Bioaccumul	ative potential					
Bio-Accumu	lative Potential	No data available on bioaccumulation.				
Partition coe	efficient	Not available.				
Ecological information on ingredients.						
		Hydrogenated base oil				
Bio-Accumulative Potential The product contains potentially bioaccumulating substances.						
Mobility in s			Auriceo.			
Mobility		No data available.				
-	nformation on ingr					
	normation on ingr					
		Hydrogenated base oil				
	Mobility	The product is insoluble in water.				
Other adver	se effects					
Other adver	se effects	None known.				
13. Disposal considerations						
Waste treatment methods						

General information	The generation of waste should be minimized or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Avoid discharge into drains or watercourses or onto the ground. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements.				
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of the local water authority.				
14. Transport information					
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, DOT, TDG).				
UN Number					
Not applicable.					
UN proper shipping name					
Not applicable.					
Transport hazard class(es)					
Transport labels					
No transport warning sign required.					
Packing group
